# CSI AFRICA 2017 – CATHETER INTERVENTIONS IN CONGENITAL, STRUCTURAL AND VALVAR HEART DISEASE

DECEMBER 1–2, 2017 | NAIROBI, KENYA

Please join us for an overview of catheter interventions in congenital, structural and valvar heart disease in children and adults. The meeting will provide a forum for physicians from Central Africa, with an opportunity to exchange ideas and learn from each other.

The scientific program is designed to address issues and topics specific to the region and will include lectures from local and international experts, debates and a large number of recorded cases during which each intervention will be explained step by step.

## WHO SHOULD ATTEND

Adult & pediatric interventional cardiologists, cardiothoracic surgeons, anesthesiologists, imaging specialists & colleagues of other disciplines who wish to know more about the field.

## TOPICS

- Paravalvar leak closure
- Left atrial appendage closure
- Pulmonary valve replacement
- Echo evaluation of ASDs and VSDs
- Coarctation stenting
- ASD closure
- VSD closure
- Transseptal puncture
- PDA closure
- Pulmonary valvoplasty
- Mitral valvoplasty
- How to develop structural, congenital and valvar interventions in Africa
- Challenging cases, problems & complications

## CSI Africa is a CSI FOUNDATION EVENT

We are dedicated to the development of congenital, structural and valvar heart interventions worldwide. Our members receive discounted entry to CSI events. Join us at [www.csi-foundation.org](http://www.csi-foundation.org)
